

Summer Term

The Solar Centre children have done some fantastic home learning this term and really taken advantage of the outdoors. When we were able to return to school we continued with the outdoors theme and focused on plants, looking at what they need to grow and carrying out an investigation to explore what would happen to a seed if we took one of those vital things away.

We are now studying Africa and learning all about life in rural villages and the differences and similarities between their lives and ours. Some of the children are keen to try living in a Maasai house with only a fence of thorns between them and the lions!
